

**ACTION MEMO**

**FOR:** DIRECTOR, DEFENSE SECURITY COOPERATION AGENCY

(b)(6)

**FROM:** (b)(6), Deputy Assistant Director, Global Execution Directorate

**JUL 31 2024**

**SUBJECT:** Excess Defense Article Database Update

- **Purpose.** This memo recommends that the International Operations (IOPS)/Global Execution (GEX) Directorate completes future updates to the Excess Defense Articles (EDA) database without needing prior DSCA principal-level approval.
  - These updates are publicly accessible through the DSCA website.
  - This would be a change to past practices.
- **Background.** In the Senate Report to the 1993 Department of Defense Appropriations Bill, Congress directed the Secretary of Defense to establish an online database where American businesses can obtain information about the sale or granting of excess property to foreign countries (TAB A). The database has been available to the public on the DSCA website for the past 30 years.
- The database is primarily used by the media and researchers to obtain information about EDA transfers, to include *Defense News* and the Data Liberation Project.
- The last update to the database occurred in 2020. It was not updated during the COVID pandemic due to competing priorities and the lack of delivery reporting from the Implementing Agencies during that time.
  - The delay in updating the database recently garnered attention from some outside outlets, including *Defense News* (Bryant Harris) and the Data Liberation Project (Alec Gitelman) in advance of a FOIA request.
- IOPS/GEX has updated the database to include all deliveries through February 2024 (TAB B). It includes the destination, quantity, type of assistance (grant or sale), and dollar values for each EDA transfer. The next update to the database will occur in December 2024.
- The Department of State approved the databased update.

**Alternate View Points**

- STO recommended principal-level review and approval of future updates to the EDA database prior to publication on the DSCA website due to possible scrutiny from media and researchers given the increased, public prominence of U.S. security cooperation.

Prepared by: (b)(6) IOPS/GEX, (b)(6)  
\*USP001414-24\*

**RECOMMENDATION:** IOPS/GEX will update the database on the DSCA website and continue doing so in a timely manner without needing prior approval from the DSCA Director or Deputy Director.

The Committee directs the Secretary of Defense to initiate a program which would make landmine detection and disabling equipment, training and support available worldwide as part of our Nation's humanitarian assistance program. The Secretary is urged to make every effort to coordinate this initiative with U.S. allies.

The Secretary of Defense is directed to report to the Committees on Appropriation, no later than May 15, 1992, with a plan and budget required for the establishment of a permanent program for the transfer of equipment and technical assistance to countries in need of mine disposal.

#### EXCESS PROPERTY BUSINESS INITIATIVE

The Committee believes strongly in the foreign policy, national security, and humanitarian benefits which accrue to the United States from the excess property program. The Committee also believes that significant commercial benefits could be realized as well if American businesses were able to coordinate their marketing of goods and services with the realtime transfer of U.S. Government property abroad.

As our military reduces in size, the Department of Defense can be expected to declare large amounts of property excess to its requirements and eligible for disposal. Most of this material will be made available to State and local governments, some will be discarded, and some will be offered to foreign governments. The Committee believes that the provision of excess property to foreign governments can serve as a stimulus to exports, providing American business with a unique opportunity to identify new markets for next generation products, training, and spare parts.

Therefore, the Committee directs the Secretary of Defense to establish, no later than July 15, 1993, an online computer data base, or clearinghouse, where American businesses can obtain timely information on the Department's sale or granting of excess property to foreign countries. The data base should include, but not be limited to, the destination, quantity, type, value, and date of transfer of the excess property slated for transfer through all Department of Defense programs, including the Humanitarian Assistance Program. The Secretary of Defense should report to the Committees on Appropriation of the Senate and the House of Representatives, no later than April 15, 1993, on the Department's plan for implementing this service and ways in which any costs can be shared with the private sector.

#### SPECIAL PROJECTS

*Heart-to-Heart.*—The Committee commends the work of Heart-to-Heart—International Children's Medical Alliance, a private voluntary organization which has worked closely the Humanitarian Assistance Program of the Department of Defense and the Department of State to deliver urgently needed medical supplies and training to the republics of the former Soviet Union. The Committee believes that it is in the national security interest of the United States to ensure that medical care in the former Soviet Union is not allowed to degenerate to the point of social unrest and political instability. Like emergency food and shelter, medical care, even at

its most elemental level, can be an important means of reassurance to an increasingly desperate society. While most of the world's attention is focused on important issues of weapons proliferation and ethnic fighting, Heart-to-Heart has been successful in targeting for assistance some of the most vulnerable citizens of the newly independent republics.

Therefore, the Committee urges the Department of Defense, in cooperation with the Department of State, to incorporate Heart-to-Heart into its relief program for the former Soviet Union and to provide whatever assistance is appropriate to effectively carry out its mission.

#### DRUG INTERDICTION AND COUNTERDRUG ACTIVITIES, DEFENSE

Appropriations, 1992 .....	\$1,188,600,000
Budget estimate, 1993 .....	1,263,400,000
House allowance .....	1,261,900,000
Committee recommendation .....	1,259,200,000

The Committee recommends an appropriation of \$1,259,200,000 in title VI, Counternarcotics and Drug Interdiction Program for fiscal year 1993. This is \$70,600,000 above the \$1,188,600,000 appropriated for fiscal year 1992 and \$2,700,000 below the House allowance.

#### SUMMARY OF COMMITTEE ADJUSTMENTS

Committee adjustments to the budget estimate are summarized in the following table:

#### DRUG INTERDICTION AND COUNTERDRUG ACTIVITIES, DEFENSE

[In thousands of dollars]

	Fiscal year 1993 budget request	House allowance	Committee rec- ommendation	Committee recommenda- tion compared with House allowance
<b>Military personnel:</b>				
Army Reserve .....	5,800	5,800	5,800	
Army National Guard .....	104,346	104,346	104,346	
Navy Reserve .....	3,800	3,800	3,800	
Marine Corps Reserve .....	1,300	1,300	1,300	
Air Force Reserve .....	2,200	2,200	2,200	
Air National Guard .....	24,908	24,908	24,908	
Subtotal, military personnel .....	142,354	142,354	142,354	
<b>Operation and maintenance:</b>				
Army .....	176,452	176,452	176,452	
Navy .....	293,193	291,193	293,193	+ 2,000
Marine Corps .....	12,044	12,044	12,044	
Air Force .....	216,568	216,568	216,568

## COUNTERNARCOTICS DRUG INTERDICTION OVERVIEW

Appropriations under this title finance the participation of the Department of Defense in the war on drugs. These funds are used to purchase fuel and spare parts for training activities, pay civilian personnel, purchase supplies and equipment, finance drug rehabilitation programs, and training exercises.

## OPERATION AND MAINTENANCE

**OPTEMPO.**—As it did last year, the Committee recommends a reduction in the budget request for counterdrug OPTEMPO and demand reduction due to excessive program growth and poor justification. The Committee recommendation reduces funding for counterdrug OPTEMPO by \$30,000,000 from the budget request of \$33,143,000.

The \$339,100,000 requested for OPTEMPO in fiscal year 1993 represents a 12.2-percent increase over the fiscal year 1992 level of \$302,200,000. Since 1991, funding for OPTEMPO has increased by \$124,000,000, or 63 percent.

The Department is unable to demonstrate through operational or performance criteria that there is a justification for these increases. The House recommended a reduction in funding by \$20,000,000. The Committee directs that no part of this reduction shall be applied against the National Guard and Reserve program.

*Demand reduction.*—The Committee recommendation reduces by \$12,000,000 from the budget request funding for demand reduction. The reduction in demand reduction funding to the fiscal year 1991 level reflects the dramatic success the Department has had since 1980 in reducing the demand for drugs in the military. A recent DOD survey reported a 82 percent drop in reported drug use since 1980.

Demand reduction funding is used primarily for the drug testing of military personnel. This 8.8-percent drop in funding to the 1991 level corresponds to a 12-percent drop in overall DOD end strength since 1991. As a result, the Committee believes there is no justification for an increase in the level of demand reduction services within the Department.

*National Guard LAV operations support.*—The Committee recommends that not less than \$2,000,000 be provided for the operation and maintenance expenses associated with the acquisition by the National Guard of 12 LAV's from Canada. The Committee directs that under no circumstances should the LAV's be armed or funds expended to study whether arming is required or possible.

*Gulf States counternarcotics initiative.*—The Committee recommends that not less than \$7,500,000 be provided for the Gulf States counternarcotics initiative [GSCI]. This funding supports the operation and equipment expenses of National Guard personnel serving as part of a multistate counternarcotics effort.

*Civil Air Patrol.*—The Committee recommends that \$2,000,000 be made available to the Civil Air Patrol [CAP] to support its participation in the drug interdiction mission. This amount is \$1,000,000 above the requested level.

These funds are to be used for CAP operational and training drug reconnaissance missions for Federal, State, and local government agencies; for administrative costs, including the hiring of CAP employees; for travel and per diem expenses of CAP personnel in support of those missions; and for equipment needed for mission support or performance. The Department of Defense and the Air Force shall waive reimbursement from the Federal, State, and local government agencies for the use of these funds.

*Linguist and intelligence analysis services.*—The Committee directs the Department of Defense to provide \$5,000,000 from funds made available for drug interdiction for linguist and intelligence analysis services for local law enforcement agencies.

*Sea-based aerostats [SBA's].*—The Committee recommends that not less than \$25,400,000 be made available to the Army from funds appropriated to the "Drug interdiction and counterdrug, Defense" account only for the operation and maintenance of five sea-based aerostat [SBA's] boats in support of the U.S. Coast Guard's drug detection and monitoring activities.

*Regional police information system [RPIS].*—The Committee recommends that not less than \$1,000,000 be provided to fund the regional police information system [RPIS]. The RPIS provides sup-

port to a group of over 70 law enforcement agencies in east Texas, northwestern Louisiana, and southwestern Arkansas, for a test project to provide initial linkage/networking capabilities between test sites.

*T-47 surveillance aircraft.*—In the report accompanying the Fiscal Year 1992 Defense Appropriations Act, the Committee directed the National Guard and the Customs Service to evaluate the use of available T-47 aircraft for counternarcotics missions. The Committee expects that funds will be made available from amounts provided in this appropriation for the lease, modification, and operation of not less than 15 T-47 aircraft by the National Guard, Customs Service, Border Patrol, or host governments with whom we jointly operate counternarcotics programs. The Assistant Secretary of Defense, Reserve Affairs, shall report the plan to operate T-47 aircraft for these missions not later than May 15, 1993.

*Placement of the Great Inagua aerostat.*—The Committee is informed that there may be difficulties in obtaining a permanent site location of the Great Inagua, Bahamas, radar aerostat platform. Presently, there is an inadequate year-to-year lease arrangement for the current aerostat location. The Committee directs the Department of Defense, in cooperation with the United States Customs Service, the Department of State and in consultation with the government of the Bahamas to develop a long-range aerostat site acquisition study for the Great Inagua radar aerostat.

This study should include optimal alternatives for the permanent placement of this aerostat, including the feasibility of purchasing the land at the current location. The Department of Defense shall take into consideration any long-term environmental liability which the U.S. Government would be acquiring by site purchase. As the expedient operation of the Great Inagua aerostat may be in the best interests of an effective drug smuggling detection and interdiction program, the Committee encourages the Department of Defense to attempt to resolve this matter as quickly as possible. The Committee expects this study to be completed no later than April 30, 1993.

The Department is directed not to take any action toward the permanent placement or temporary relocation of the Great Inagua aerostat, without the notification and prior approval of the Committee.

#### PROCUREMENT

*National Guard light armored vehicles [LAV's].*—The Committee recommends that not less than \$12,000,000 be provided only for the purchase from Canada of the 12 LAV's which have been in use by the National Guard since August 1991.

#### RESEARCH AND DEVELOPMENT

*Contraband detection technologies.*—In fiscal years 1991 and 1992, Congress provided funds for the Department of Defense to develop prototype technologies that detect and monitor the flow of illegal drugs smuggled in cargo containers. DARPA, in coordination with the Customs Service, prepared a comprehensive plan outlining a program through fiscal year 1994 that called for the development

of prototype technology demonstrations operated by law enforcement agencies at selected U.S. ports of entry. DARPA has completed the first phase of the plan by selecting the most promising technology developments and initiating proof-of-principle test beds.

Unfortunately, the Committee has been advised that this important initiative may be terminated prematurely and that DARPA may not proceed beyond the proof-of-principle phase. The Committee is concerned that this action would cause a loss of management focus and momentum on this vital element of the Nation's drug interdiction and counterdrug activities. It is the Committee's intention that DARPA comply with its April 1, 1992, prototype container technology development plan for contraband detection/cargo container inspection and that all competing technologies be tested in phase two of the plan. Accordingly, the Committee directs the Department of Defense to provide funding for the continued implementation of this program.

TITLE III  
PROCUREMENT

ESTIMATES AND APPROPRIATION SUMMARY

The fiscal year 1993 Department of Defense procurement budget request totals \$55,764,498,000. This request is \$7,606,202,000, or 12 percent, below the amounts requested for the procurement appropriations for fiscal year 1992 and \$8,500,211,000, or 15 percent, below the amounts appropriated by Congress in fiscal year 1992.

The accompanying bill recommends \$52,491,567,000 in new budget authority. The total amount recommended is a decrease of \$3,799,331,000 below the fiscal year 1993 amended budget estimate and is \$1,745,822,000 below the amounts provided by the House allowance. The table below summarizes the procurement budget estimates and the Committee recommendations:

[In thousands of dollars]

Item	Budget request	House allowance	Committee recommendation	Recommendation versus—	
				Budget request	House allowance
<b>Army:</b>

## PROCUREMENT OVERVIEW

In the review of the Department's procurement request, the Committee is attempting to address the military industrial base of the country; that is, to recommend actions to various investment programs that recognize the need to decrease the defense budget, but build down investment programs in such a way that the industrial base is maintained in a viable manner. It is the feeling of the Committee that certain investment programs should not be reduced to a certain level or terminated if such action would force a depletion of a segment of the industrial base that could not be maintained in civilian applications and would be difficult if not impossible to rebuild at a later date when national security circumstances are different than at present. Some examples of the Committee's effort as explained further in the report include adjustments to the Army's M-1 tank upgrade and Bradley fighting vehicle programs, the Army's MLRS rocket program, and various ammunition initiatives and adjustments to maintain industrial capability.

*Global positioning system.*—For several years, the Congress has funded the installation of GPS receivers onto various aircraft in the services. In fiscal year 1993, the military departments are requesting in excess of \$150,500,000 for these efforts. However, in reviewing the obligation of funds for GPS installation over the past several years it is clear that delays have been common in many programs. Funds have been deferred or reapplied for other purposes. The Committee recognizes the importance of the GPS system, but can no longer tolerate the apparent lackadaisical management of the program. Therefore, the Committee recommends no funds for the integration of GPS receivers into aircraft in fiscal year 1993. The various aircraft appropriation accounts display the specific adjustments.

Furthermore, the Committee expects that the fiscal year 1994 budget, if funding is included for any GPS modifications, will provide justification material which clearly delineates by program element the funding requested for GPS-related work in each of the procurement appropriations. Funding subsumed in block upgrade programs must also be specifically identified in the justification material.

*Aircraft weight.*—The Committee is concerned with the increasing weight of aircraft as new components are incorporated into existing aircraft. Numerous examples of stress cracks have occurred in current aircraft inventories, of which many were related to higher weights than envisioned by engineers who designed the basic aircraft. The Committee believes that insufficient attention is being paid by the services to the need to hold down aircraft weight. Further, in this age of miniaturization the Committee believes that increasing weight should not necessarily occur with upgrades.

The Committee has not offered a prohibition on modifications which cause weight increases in existing aircraft, but will continue to monitor this problem. If the services fail to demonstrate any plan to minimize this costly problem, the Committee will consider denying funding in fiscal year 1994 for any modification, except for those for safety concerns, which would increase the weight of an aircraft.

*Commercial pricing.*—In recent years Congress has repeatedly expressed its concern that insufficient use is being made of commercial components and products to meet military needs. In the past year, the Department of Defense in the "Report to Congress on the Defense Industrial Base," November 1991 and in the white paper entitled "Defense Industrial Base," has stated its commitment to using commercial products and processes wherever possible. The Committee directs the Secretary of Defense to inform the Committee by May 1, 1993, which regulations that the Department intends to amend and the laws that need revision in order to permit broader usage of commercial hardware and software for military systems.

#### AUTOMATED DATA PROCESSING

*Desktop IV contract.*—Desktop IV is an indefinite delivery/indefinite quantity ADP contract administered by the Air Force. The contract was originally expected to be awarded in November 1991, but was delayed to resolve protests. According to the Air Force, the contract is now under recompetition and is expected to be awarded in September 1992. Given the large size of this contract, it is likely that another protest could be lodged and other contract delays could also occur. In view of these factors, the Committee recommends that fiscal year 1993 funding be reduced by \$30,000,000 to reflect the impact of the contract delay. This recommendation results in the following reductions:

[In thousands of dollars]	
Army: Operation and maintenance .....	- 10,000
Navy: Operation and maintenance .....	- 10,000
Air Force: Operation and maintenance .....	- 10,000
Total .....	- 30,000

*Indefinite delivery/indefinite quantity [IDIQ] contracts.*—The Committee is pleased that the Department is exercising review over the level of IDIQ automated data processing contracts and expects continuation of this oversight. The Committee directs the Department to continue to limit the level of fiscal year 1993 IDIQ purchases to those amounts requested in the fiscal year 1993 amended President's budget exhibit 43, as adjusted by final con-

gressional action. As was the case in fiscal year 1992, authority to exceed these controls must be granted by the DOD senior official for information resource management in the Office of the Assistant Secretary of Defense (C<sup>3</sup>I). The Committee requests a summary listing of waivers granted by dollar amount and appropriation through the third quarter of fiscal year 1993 to be provided not later than July 15, 1993, and a final report on fiscal year 1993 waivers due not later than October 31, 1993.

#### AIR FORCE

*Core automated maintenance system [CAMS]/reliability and maintainability information system [REMIS].*—During the review of the fiscal year 1992 President's budget request, this Committee expressed concern about the ability of CAMS and REMIS to effectively and consistently provide the kind of timely and accurate data necessary for Air Force managers to use in effectively managing weapon systems. The conference committee on appropriations for fiscal year 1992 directed that the General Accounting Office [GAO] examine the capabilities of CAMS and REMIS and that the Department perform a major automated information system review council [MAISRC] review on CAMS and REMIS upon completion of the GAO report. GAO expressed concern about data accuracy with respect to CAMS, which feeds data into REMIS and also expressed concern with overall performance of REMIS, such as response time and input backlogs. GAO also cited data accuracy problems with REMIS, some categorized as category I, or catastrophic. Based on the OSD MAISRC review, OSD has retained Milestone III review and approval oversight of CAMS and REMIS and has directed the Air Force not to replace any other existing automated systems before such a review, which is projected to take place late in fiscal year 1993. Currently, the principal system other than CAMS/REMIS is the tactical interim CAMS and REMIS reporting system [TICARRS], which currently supports all F-16 aircraft and approximately 39 percent of the F-15 fleet. Given the pending OSD review of CAMS/REMIS, the Committee supports continued operations of TICARRS and CAMS/REMIS through fiscal year 1993, as the systems are now operating. However, the Committee does not support any expansion of the TICARRS system; that is, support of additional aircraft or weapon system that TICARRS is not currently supporting. The Committee has included bill language under the operation and maintenance, Air Force section that earmarks \$12,000,000 for the continued operation of TICARRS in fiscal year 1993, and maintains the status quo until expected completion of the MAISRC review. Also, the Committee directs the Department to perform an independent cost/operation effectiveness analysis comparing CAMS/REMIS and TICARRS through the Institute for Defense Analysis to be provided to the Committees on Appropriations by September 30, 1993. The Committee recommends an increase of \$500,000 to operation and maintenance, Air Force, to accomplish this study.

*Personnel concept [PC] III.*—The Air Force budget request includes \$47,731,000 for PC III, an ADP program to upgrade personnel services at Air Force bases worldwide. The fiscal year 1993 estimate increases over that for fiscal year 1992 by approximately 62

percent and justification indicates the Air Force plans to provide PC III hardware to each Air Force base by fiscal year 1993. This plan appears somewhat premature, given the administration's plans to announce additional base closures and realignments for fiscal year 1993. Given the uncertainty of how many bases will require coverage, the Committee recommends that fiscal year 1993 procurement and operation and maintenance funds for this program be no higher than that expected to be obligated in fiscal year 1992. The Committee recommends the following reductions for PC III:

Other procurement .....	-\$8,900,000
Operation and maintenance .....	-7,000,000
Total .....	-15,900,000

#### DEFENSE AGENCIES

*Composite health care system [CHCS].*—The fiscal year 1992 conference report on appropriations directed the Department to study and report on alternatives to the current CHCS inpatient order entry [IPOE] module under development. The Department has indicated that after extensive investigation, no vendors have displayed alternatives that are considered acceptable in terms of all functional, technical, and cost areas. The Committee understands the Department is further investigating other commercial off-the-shelf applications that may enhance the current IPOE computer application. The Committee supports this effort and directs the Department to submit a report not later than June 30, 1993, to detail the status of IPOE computer application to include its impact on the Department's plans to field CHCS.

#### CORPORATE INFORMATION MANAGEMENT [CIM]

Funding for CIM programs for the past 2 fiscal years, although submitted to Congress separately by the military services and defense agencies, has been consolidated into a central transfer fund that has been administered and allocated back to services and agencies based on review by the Office of the Assistant Secretary of Defense for Command, Control, Communications and Intelligence [C<sup>3</sup>I]. The rationale behind funding centralization for the past 2 years stems from the Committee's belief that the vast array of CIM programs did not have the maturity in terms of program and budget definition to allow the services and agencies to execute as they would other programs within their budget authority. Indeed, this rationale of centralization had merit as the development of the CIM concept had only begun in late 1989 with the goal to consolidate and manage information management systems that were previously administered by the services and agencies, much in a duplicate, redundant manner. With this short program history, funding consolidation with separate reviews prior to service execution was in the best interests of the Department during the formative years of the CIM concept.

There is ample evidence that further funding consolidation for fiscal year 1993 is not in the best interests of the Department and the execution of CIM programs. The consolidation for fiscal year 1991 produced considerable delays in funding allocation to services

and agencies because it was the first year that required justification of programs from the central fund, and further confusion was created because the fund included programs that were actually not related to CIM. In fiscal year 1992, the CIM transfer fund was better defined and contained only funding for CIM-designated programs, ADP development and modernization initiatives, and Computer-Aided Acquisition and Logistics Support Program funding. However, the centralization process still caused lengthy delays in final funding allocation to services and agencies. As of March 1992, only 77 percent of funding had been allocated and the final allocation of CIM resources was not complete until June. This suggests that the honorable intentions of a detailed review process before funding allocation are outweighed by the delays caused by the attempt to accomplish this during the year of execution, compounded by the lengthy reprogramming process used to transfer funding from the central account to the service.

There have been other developments within the Department which may further negate the need for CIM funding centralization. Since the inception of the CIM concept, the Department has moved to centralization of major functions, such as financial management, by the creation by the Defense Finance and Accounting Service, the consolidation of the service supply depots under the Defense Logistics Agency, and the consolidation of medical funding under the Assistant Secretary of Defense for Health Affairs, to name a few. In addition, officials within the Assistant Secretary of Defense (C<sup>3</sup>I) exercise review over the services' budget requests under the CIM umbrella, as well as perform oversight of DOD Federal information processing resource acquisition contracts. Also, the Assistant Secretary of Defense (C<sup>3</sup>I) is able to withhold funding from a service if it is deemed necessary during the course of execution.

In consideration of the above factors, the Committee will not centralize funding for CIM resources in fiscal year 1993. However, the Committee is still concerned about the progress of the CIM initiative and directs the Department to submit a report to this Committee no later than March 31, 1993, to detail, by program, how much funding has been obligated as of that date. The report should track to specific programs and funding baselines that have been provided to this Committee by the Office of the Deputy Assistant Secretary of Defense (Information Systems), and should also detail any changes to the baselines programs added to, or deleted from, the list of CIM initiatives, with reasons therefore. A similar report shall be sent to this Committee no later than October 31, 1993, to detail the above information as of the close of fiscal year 1993. The Committee is still concerned about potential duplication of information systems and should evidence demonstrate that the Department is not adhering to the principles established by the CIM concept of eliminating such duplication, the Committee will be forced to continue the process of funding centralization in future years.

*Computer-aided acquisition and logistics system [CALs].*—For the past 2 fiscal years, CALs funding has been consolidated into a transfer account as a portion of CIM-related funding. Although the Committee is not consolidating CALs funding for fiscal year 1993, the Committee is concerned about the management of CALs, which encompasses multiple programs in all services. Because of

the large scope of the CALS effort, the Committee directs that the Assistant Secretary of Defense (Production and Logistics) exercise management control over the various CALS programs through the Joint Logistics Systems Center. Although this direction does not involve funding transfer or allocation, the Committee is concerned that this program receive central OSD leadership to avoid the proliferation of miscellaneous service efforts that are not necessary or do not conform to the principles and goals of the overall CALS effort. The programs which the Committee directs central management of by ASD [P&L] include the following:

COMPUTER-AIDED LOGISTICS SYSTEM [CALS]—FISCAL YEAR 1993

Functional area/program	Service	Amount
<b>Tech manuals:</b>		
JCALs .....	Army .....	\$85,500,000
ACAPS .....	Army .....	400,000
EOPOB .....	Army .....	190,000

TMPODS .....	Navy .....	15,000,000
Subtotal, printing .....		(40,400,000)
Grand total CALS .....		307,820,000

## SPECIAL OPERATIONS FORCES

The Committee continues its strong support for the mission of U.S. special operations forces, believing that the role they play as part of a robust military establishment is fully justified by the changing world events. The end of the cold war and the reemergence of centuries old ethnic and political conflicts the world over, makes the need for a force tailored for the low-intensity conflict mission that much more essential.

## SOF PROCUREMENT

The Committee recommends the following specific adjustments to the command's procurement amended budget request of \$682,122,000:

## ADJUSTMENTS SPECIFIC TO SPECIAL OPERATIONS—PROCUREMENT

[In thousands of dollars]

Program	P-1 line	Adjustment
SOF pyro/demonstration .....	51	-12,000
Miscellaneous equipment .....	64	-9,243
Patrol coastal (Hellfire missile) .....	49	-5,300
SOF intelligence systems [IREMBASS] .....	60	-15,000
Special operations MC-130H combat Talon II, block V MOD program .....		-18,748
Total adjustments .....		-58,291

## SOF AMMUNITION PROGRAMS

*SOF pyro/demo.*—The Committee recommends a reduction of \$12,000,000 from the budget request of \$25,291,000 for SOF pyro/demonstration due to poor obligation rate of fiscal year 1992 funds and continuing technical problems acknowledged by SOF. A timed delay firing device [TDFD] required for this program is in need of redesign and testing. The fiscal year 1992 contract originally scheduled to be awarded in April 1992 will not occur until October 1992. This recommendation concurs with that proposed by the Senate authorization committee.

## OTHER SOF PROCUREMENT PROGRAMS

*Miscellaneous equipment.*—The Committee recommends a reduction of \$9,243,000 from the budget request of \$14,995,000 for miscellaneous equipment. The recommendation is for a reduction in program growth over the level provided in fiscal year 1992 for SOF headquarters equipment, electronics, telecom systems, and color copiers. Reduction in the diver propulsion vehicles [DPV] and integrated night vision helmet system [INVHS] request is due to poor obligation performance. The recommended reduction for DPV and INVHS concurs with that proposed by the House Appropriations Committee and the Senate authorization committee. Reductions in the following amounts for miscellaneous are recommended by the Committee:

Management headquarters electronics and telecom systems .....	- \$830,000
USSOCOM color copiers, graphics .....	- 300,000
Diver propulsion vehicles .....	- 3,000,000
Integrated night vision helmet system .....	- 5,113,000

*Patrol coastal (Hellfire missile).*—The Committee recommends a reduction of \$5,300,000 from the budget request of \$25,433,000 for the coastal patrol craft program. These funds, requested to procure Hellfire missiles, should be deferred until fiscal year 1994 so that further work can be done on the stabilized weapons platform system [SWPS]. The Committee understands that USSOCOM is currently conducting a cost operational effectiveness analysis [COEA] to determine the funding profile for this item. This recommended reduction concurs with that proposed by the House Appropriations Committee and the Senate authorization committee.

*SOF intelligence systems [IREMBASS].*—The Committee recommends a reduction of \$15,000,000 in funding from the budget request of \$34,289,000 for the IREMBASS system due to a poor obligation rate of fiscal year 1992 funds. This recommended reduction concurs with that proposed by the Senate authorization committee.

*Special operations MC-130H combat Talon II, block V MOD program.*—The Committee recommends a denial of procurement funding for the block V upgrade to the combat Talon II program estimated at \$18,748,000. Since receiving initial funding in fiscal year 1983, the combat Talon II program has doubled in cost to \$1,900,000,000 for 24 aircraft and has fallen 4½ years behind schedule. No funds are to be made available by USSOCOM for the block V upgrade to the combat Talon II.

#### OTHER ADJUSTMENTS

*Inflation adjustment.*—In section 9129 of the bill, the Committee recommends a general reduction to title III in the amount of \$104,000,000 to account for an inflation adjustment from the budgeted level of 3.3 percent to a new inflation estimate of 3.1 percent. This general reduction shall be applied accordingly:

Army .....	-\$12,740,000
Navy .....	-41,340,000
Air Force .....	-45,916,000
Defense agencies .....	-4,004,000
<b>Total .....</b>	<b>-104,000,000</b>

#### AIRCRAFT PROCUREMENT, ARMY

Appropriations, 1992 .....	\$1,692,800,000
Budget estimate, 1993 .....	1,259,259,000
House allowance .....	1,414,659,000
Committee recommendation .....	1,256,842,000

The Committee recommends an appropriation of \$1,256,842,000, a decrease of \$34,417,000 from the budget request and \$157,817,000 below the budget.

This account finances the acquisition of tactical and utility helicopters and airplanes, including associated electronics, communications equipment, and armament; modification and modernization of in-service aircraft; flight simulators; ground support equipment; production base support; and components and spare parts including transmissions and gear boxes.

**ACTION MEMO**

D/Director \_\_\_\_\_

**JAN 05 2016**

**FOR: DIRECTOR, DEFENSE SECURITY COOPERATION AGENCY**

**FROM: Principal Director, Building Partnership Capacity**

(b)(6)

**SUBJECT: Morocco, Excess Defense Articles (EDA) Grant, M-Series Vehicles, Congressional Notification (CN)**

- This memo requests you notify Congress of the proposed EDA grant transfer of 240 excess M-series vehicles to the Kingdom of Morocco as indicated in TAB A.
- Pursuant to section 516(f)(1) of the Foreign Assistance Act (FAA) of 1961, as amended, a CN is required since some of the items are significant military equipment and the request exceeds \$7M in original acquisition value.
  - Defense Logistics Agency Disposition Services (DLA DS) forwarded a request to transfer 240 M-series excess vehicles to the Kingdom of Morocco under section 516 of the FAA. (TAB B)
  - Morocco is eligible to receive EDA in Fiscal Year 2016 pursuant to section 516 of the FAA via the annual Congressional notification letters dated October 8, 2015, which state: "Potential uses of such EDA include helping Morocco sustain its military forces and build counterterrorism and maritime security capabilities, and promoting interoperability with the United States and other NATO forces."
  - The proposed transfer will contribute to the Moroccan military self-defense capability and peacekeeping operations replacing obsolete trucks and reinforcing Army units. The proposed vehicles will be used in operations and training to increase the operational readiness of the Moroccan Armed Forces for self-defense purposes, and to support participation in joint exercises and international peacekeeping operations. The items will be refurbished in the Moroccan Army repair facilities. The vehicles are located in Germersheim, Germany, and various locations in the contiguous United States. Similar equipment has been previously approved for transfer to Morocco under the EDA program.
  - This proposed EDA transfer will not have an adverse impact upon the United States national technology and industrial base or reduce opportunities for business entities to sell new or used equipment to the Kingdom of Morocco. DLA DS knows of no United States industry initiative to market similar vehicles to the Kingdom of Morocco.
  - This transfer on a grant basis is preferable to a transfer on a sales basis after taking into account the potential proceeds from and the likelihood of such a sale and the comparative foreign policy benefits that may accrue to the United States. It is in the United States' national interest because Morocco is a Major Non-NATO Ally and key partner on

Prepared by: (b)(6) DSCA/BPC/EQP, (b)(6)

U S P O 0 3 9 1 7 - 1 5

regional security issues of mutual concern such as border security and related counterterrorism initiatives.

- After CN is complete, DSCA will authorize the DLA DS to offer/transfer the items to the Kingdom of Morocco.

RECOMMENDATION: Sign the letters at TAB A.

As stated

DEFENSE SECURITY COOPERATION AGENCY

201 12TH STREET SOUTH, STE 203  
ARLINGTON, VA 22202-5408

JAN 05 2016

The Honorable Thad Cochran  
Chairman  
Committee on Appropriations  
United States Senate  
Washington, DC 20510

Dear Mr. Chairman:

Pursuant to section 516 of the Foreign Assistance Act (FAA) of 1961, as amended, we are providing notification of the proposed grant transfer of 240 excess M-series vehicles to the Kingdom of Morocco under the Excess Defense Articles (EDA) program. The total current value of the vehicles is estimated to be \$5,566,304. The original acquisition value of the vehicles was \$26,933,650. The specific notification data for this transfer is attached.

The offer is based on United States' military judgments as to the most appropriate way of satisfying legitimate Moroccan military requirements and priorities. Morocco is a Major Non-NATO Ally and key partner on regional security issues of mutual concern. The proposed vehicles will be used in operations and training to increase the operational readiness of the Moroccan Armed Forces for self-defense and counterterrorism purposes, and to support participation in joint exercises and international peacekeeping operations. Similar vehicles have been previously approved for transfer to Morocco under the EDA program.

There will be no adverse impact upon United States' military readiness as a result of this transfer. I determine that the transfer of these items will not have an adverse effect on the national technology and industrial base nor will it reduce the opportunities of entities in the national technology and industrial base to sell new or used equipment to the Kingdom of Morocco. Transferring the excess items under section 516 of the FAA is preferable to selling them after taking into account the potential proceeds from and likelihood of such sale and the comparative foreign policy benefits that may accrue to the United States as a result of the transfer. The items are excess to Department of Defense requirements, including those of the National Guard and Reserve components.

Sincerely,

(b)(6)

J. W. Kixey  
Vice Admiral, USN  
Director

**ACTION MEMO**

**MAY 22 2018**

D/Director (b)(6)  
Prepared by: (b)(6) DSA/AMP  
Phone Number: (b)(6)

**FOR:** DIRECTOR, DEFENSE SECURITY COOPERATION AGENCY

**FROM:** Principal Director, Directorate of Security Assistance (b)(6)

**SUBJECT:** Afghanistan, Excess Defense Articles (EDA) Grant, M24 Sniper Rifles, Congressional Notification (CN)

**PURPOSE:** This memorandum requests you notify Congress of the proposed EDA grant transfer of 357 excess M24 Sniper Rifles to the Government of Afghanistan as indicated in TAB A.

**COORDINATION:** DSA/AMP coordinated the EDA request with DoS (PM/RSAT), DoC (BIS), OUSD(P), OGC, STR, IRT-C.

**BLUF:** After the CN is complete, DSCA will authorize the U.S. Army to offer/transfer the items to the Government of Afghanistan.

**DISCUSSION:**

- The U.S. Army forwarded the request at TAB B to transfer 357 excess M24 Sniper Rifles to the Government of Afghanistan under Section 516 of the Foreign Assistance Act (FAA) of 1961, as amended.
  - Pursuant to Section 516(f)(1) of the FAA, a CN is required since the items are significant military equipment.
  - Afghanistan is eligible to receive EDA in Fiscal Year 2018 pursuant to Section 516 of the FAA via the annual Congressional Notification letters dated October 27 2017, which state: "Potential uses of such EDA include furthering the goals of the Afghan National Security Forces' Train and Equip Program to field a modern army capable of supporting Operation FREEDOM'S SENTINEL, supporting border security efforts of Afghanistan, and assisting the United States and NATO as a partner in overseas contingency operations."
  - The proposed transfer is intended to equip Afghanistan Army (Ministry of Defense) soldiers. The rifles will fill existing operational shortfalls and enhance shoot capability and force protection. The rifles will be used to maintain security within Afghanistan by supporting on-going operations (Resolute Support) and security sustainment efforts against Taliban-led insurgency, al Qaeda and its associates, and other terrorists groups in Afghanistan. This transfer on a grant basis is preferable to a transfer on a sales basis after taking into account the potential proceeds from, and the likelihood of, such a sale and the

comparative foreign policy benefits that may accrue to the United States. The transfer is in the U.S. national interest because it will further the efforts of the Afghan people in operational readiness allowing them to secure the country from anti-government forces.

RECOMMENDATION: Sign the letters at TAB A.

The Honorable Eliot L. Engel  
Ranking Member

**Congressional Notification**  
**Excess Defense Articles (EDA), Grant**  
**Afghanistan, M24 Sniper Rifles**

Pursuant to Section 516 of the Foreign Assistance Act (FAA) of 1961, as amended, we are providing notification of the proposed grant transfer of 357 excess M24 Sniper Rifles to the Government of Afghanistan under the Excess Defense Articles (EDA) program. The total current value of the items is estimated to be \$250,935. The original acquisition value of these items was \$2,509,353. The specific notification data for this transfer are attached.

The offer is based on U.S. military judgments as to the most appropriate way of satisfying legitimate Afghanistan security requirements and priorities. The proposed transfer is intended to equip Afghanistan Army (Ministry of Defense) soldiers. The rifles will fill existing operational shortfalls and enhance shoot capability and force protection. The rifles will be used to maintain security within Afghanistan by supporting on-going operations (Resolute Support) and security sustainment efforts against Taliban-led insurgency, al Qaeda and its associates, and other terrorists groups in Afghanistan. Afghanistan currently owns identical items however the items were not previously provided to Afghanistan under the EDA program.

There will be no adverse impact upon U.S. military readiness as a result of this transfer. I determine that the transfer of these items will not have an adverse effect on the national technology and industrial base nor will it reduce the opportunities of entities in the national technology and industrial base to sell new or used equipment to the Government of Afghanistan. Transferring the excess items under Section 516 of the FAA is preferable to selling them after taking into account the potential proceeds from, and likelihood of, such a sale and the comparative foreign policy benefits that may accrue to the United States as a result of the transfer. The transfer is in the U.S. national interest because it will further the efforts of the Afghan people in achieving operational readiness allowing them to secure the country from anti-government forces. The items are excess to Department of Defense requirements, including those of the National Guard and Reserve components.

## ACTION MEMO

D/Director \_\_\_\_\_

FOR: DIRECTOR, DEFENSE SECURITY COOPERATION AGENCY

FROM: Principal Director, Building Partnership Capacity

SUBJECT: Taipei Economic and Cultural Representative Office (TECRO), Excess Defense Articles (EDA) Sale, Oliver Hazard Perry Class Frigates (FFGs), Congressional Notification (CN)

- This memo requests you notify Congress of the proposed EDA sale of two excess FFGs to the TECRO/Taiwan Navy as indicated at TAB A.
- Section 21 of the Arms Export Control Act (AECA), as amended (22 U.S.C. § 2761), authorizes the sale of EDA from the Department of Defense and the Coast Guard to any eligible country or international organization if:
  - The country or international organization agrees to pay in United States dollars, and
  - The sale will not have an adverse impact on the national technology and industrial base and, particularly, will not reduce the opportunities of entities in the national technology and industrial base to sell new or used equipment to the country. (Section 21(k) of the AECA (22 U.S.C. § 2761(k) applies).
- The Navy International Programs Office (NIPO) forwarded a request to sell two excess FFGs to TECRO/Taiwan Navy under section 21 of the AECA. The sale of the FFGs to TECRO/Taiwan Navy was authorized in legislation in December 2014. TAB B
  - CN is required since the items are significant military equipment and over \$7M in original acquisition cost. (Subsection 516(f)(1) of the Foreign Assistance Act applies).
  - The Taiwan Navy will use the FFGs to fulfill maritime security and anti-submarine warfare missions in the vicinity of Taiwan protecting against air, surface, and subsurface conventional threats, a capability supported by the United States Naval Component Commands supporting the Pacific region. The FFGs will allow the Taiwan Navy to retire two aging former United States-transferred frigates which are decades past their expected service life. (The two additional FFGs authorized in the legislation will be addressed in the future.)
  - This EDA sale is in the United States' national interest because the items will support Taiwan's defensive capabilities for promoting peace, security, and stability in the Western Pacific. The transfer will also support the rebalance in the Pacific region by strengthening alliances and partnerships with Taiwan.
- After the CN is complete, DSCA will authorize the NIPO to offer the items to TECRO.

The Honorable Thad Cochran  
Chairman  
Committee on Appropriations  
United States Senate  
Washington, DC 20510

DEC 16 2015

Dear Mr. Chairman:

Pursuant to the notification requirements of Section 7016 of Division J of the Consolidated and Further Continuing Appropriations Act, 2015 (P.L. 113-235, and Section 516 of the Foreign Assistance Act (22 USC 2321j), this letter provides notification that the United States Government will sell two excess Oliver Hazard Perry Class Frigates (FFGs) to the Taipei Economic and Cultural Representative Office (TECRO) under the Excess Defense Articles (EDA) program. The total current value of these items is estimated to be \$23,572,850. The original acquisition value of these items was \$471,457,000. The specific notification data for this transfer are attached.

The offer is based on United States' military judgments as to the most appropriate way of satisfying the legitimate defense requirements and priorities of the Taiwan Navy. The Taiwan Navy will use the FFGs to fulfill maritime security and anti-submarine warfare missions in the vicinity of Taiwan, a capability supported by the United States Naval Component Commands supporting the Pacific region. The FFGs will allow the Taiwan Navy to retire two aging former United States-transferred frigates which are decades past their expected service life. This EDA sale is in the United States' national interest because the items will support Taiwan's defensive capabilities for promoting peace, security, and stability in the Western Pacific. The transfer will also support the rebalance in the Pacific region by strengthening alliances and partnerships with Taiwan. Similar items have been previously sold to Taiwan under the EDA program.

There will be no adverse impact upon United States' military readiness as a result of this transfer. I determine that the transfer of the items will not have an adverse effect on the national technology and industrial base nor will it reduce the opportunities of entities in the national technology and industrial base to sell new or used equipment to TECRO. The items to be delivered are excess to Department of Defense requirements, including those of the National Guard and Reserve components.

**ACTION MEMO**

FOR: PRINCIPAL DIRECTOR, DIRECTORATE OF SECURITY ASSISTANCE

FROM: Acting Deputy, Assistance and Monitoring Programs

SUBJECT: Colombia, Excess Defense Articles (EDA) Grant, C-130H, Congressional Notification (CN)

- This memo requests you notify Congress of the proposed EDA grant transfer of one excess C-130H to Colombia as indicated in TAB A.
- Pursuant to section 516(f)(1) of the Foreign Assistance Act (FAA) of 1961, as amended, a CN is required since the proposed item for transfer is significant military equipment and over \$7M in original acquisition cost.
  - The United States Air Force (USAF) forwarded the request at TAB B to transfer one excess C-130H to the Government of Colombia under section 516 of the FAA. The allocation of the EDA C-130H to Colombia was recommended by an EDA Coordinating Committee and the plan was approved by the Director, DSCA, on October 6, 2016.
  - Colombia is eligible to receive EDA in fiscal year 2017 pursuant to Section 516 of the FAA via the annual Congressional notification letters dated September 30, 2016, which state: "Potential uses of such EDA include enhancing interoperability and the modernization of its military equipment, and supporting counterterrorism and counter-narcotics activities."
  - Colombia currently operates three C-130B and three C-130H aircraft; however the B models are scheduled to retire in 2017-2018 due to low-mission capable rates and the age and condition of the aircraft. The transfer of this aircraft helps prevent the mission degradation and lowered operational capacity of C-130s in the Colombian Air Force that will occur as a result of the B model retirements. Colombia will use national funds for associated fees for repair and packaging, crating, handling and transportation. Similar equipment has been previously transferred to Colombia under the EDA program.
  - This transfer on a grant basis is preferable to a transfer on a sales basis, after taking into account the potential proceeds from, and the likelihood of, such a sale, and the comparative foreign policy benefits that may accrue to the United States.
- After the CN is complete, DSCA will authorize the United States Air Force to offer/transfer the C-130H to Colombia.

Prepared by: (b)(6) DSCA/DSA/AMP, (b)(6)

RECOMMENDATION: Sign the letters at TAB A.

DEFENSE SECURITY COOPERATION AGENCY

201 12<sup>TH</sup> STREET SOUTH, STE 203  
ARLINGTON, VA 22202-5408

The Honorable Thad Cochran  
Chairman  
Committee on Appropriations  
United States Senate  
Washington, DC 20510

JUN 15 2017

Dear Mr. Chairman:

Pursuant to Section 516 of the Foreign Assistance Act (FAA) of 1961, as amended, we are providing notification of the proposed grant transfer of one excess C-130H to the Government of Colombia. The total value of the Excess Defense Articles (EDA) is estimated to be \$12,000,000. The original acquisition value of the item was \$30,000,000. The specific notification data for this transfer are attached.

The offer is based on United States military judgment as to the most appropriate way of satisfying legitimate Colombian Air Force requirements and priorities. Transfer of the C-130H to Colombia is in keeping with current security cooperation guidance with particular emphasis in the area of capacity building. It would significantly improve Colombia's effectiveness in undergoing and supporting domestic and international humanitarian aid and disaster relief, and counternarcotic operations, as well as, ensuring continued interoperability with United States military forces. Similar equipment has been previously transferred to Colombia.

There will be no adverse impact upon United States military readiness as a result of this transfer. I determine that the transfer of this item will not have an adverse effect on the national technology and industrial base nor will it reduce the opportunities of entities in the national technology and industrial base to sell new or used equipment to Colombia. Transferring the excess item under Section 516 of the FAA is preferable to selling it after taking into account the potential proceeds from and the likelihood of such a sale and the comparative foreign policy benefits that may accrue to the United States as a result of the transfer. The item is excess to Department of Defense requirements, including those of the National Guard and Reserve components.

Sincerely,

(b)(6)

Michèle Hizon (b)(6)  
Principal Director  
Directorate of Security Assistance

Dear Mr. Chairman:

Pursuant to Section 516 of the Foreign Assistance Act (FAA) of 1961, as amended, we are providing notification of the proposed grant transfer of one excess C-130H to the Government of Colombia. The total value of the Excess Defense Articles (EDA) is estimated to be \$12,000,000. The original acquisition value of the item was \$30,000,000. The specific notification data for this transfer are attached.

The offer is based on United States military judgment as to the most appropriate way of satisfying legitimate Colombian Air Force requirements and priorities. Transfer of the C-130H to Colombia is in keeping with current security cooperation guidance with particular emphasis in the area of capacity building. It would significantly improve Colombia's effectiveness in undergoing and supporting domestic and international humanitarian aid and disaster relief, and counternarcotic operations, as well as, ensuring continued interoperability with United States military forces. Similar equipment has been previously transferred to Colombia.

There will be no adverse impact upon United States military readiness as a result of this transfer. I determine that the transfer of this item will not have an adverse effect on the national technology and industrial base nor will it reduce the opportunities of entities in the national technology and industrial base to sell new or used equipment to Colombia. Transferring the excess item under Section 516 of the FAA is preferable to selling it after taking into account the potential proceeds from and the likelihood of such a sale and the comparative foreign policy benefits that may accrue to the United States as a result of the transfer. The item is excess to Department of Defense requirements, including those of the National Guard and Reserve components.

Sincerely,

(b)(6)

Michèle Hizon (b)(6)  
Principal Director
